

Tx: C_{ep} two-angle scans at characteristic kinematics

high_s, high_theta_in
low_Egamma, max C_{ep} =0.572

high_s, high_theta_in
mid_Egamma, max C_{ep} =0.611

high_s, high_theta_in
high_Egamma, max C_{ep} =0.666

Tx: $C_{e\gamma}$ two-angle scans at characteristic kinematics

high_s, high_theta_in
low_Egamma, max $C_{e\gamma}$ =0.672

high_s, high_theta_in
mid_Egamma, max $C_{e\gamma}$ =0.627

high_s, high_theta_in
high_Egamma, max $C_{e\gamma}$ =0.857

Tx: $C_{p\gamma}$ two-angle scans at characteristic kinematics

high_s, high_theta_in
low_Egamma, max $C_{p\gamma}$ =0.573

high_s, high_theta_in
mid_Egamma, max $C_{p\gamma}$ =0.613

high_s, high_theta_in
high_Egamma, max $C_{p\gamma}$ =0.666

Tx: M_e two-angle scans at characteristic kinematics

Tx: M_p two-angle scans at characteristic kinematics

Tx: M_γ two-angle scans at characteristic kinematics

Tx: F_3 two-angle scans at characteristic kinematics
