

Ty: C_{ep} two-angle scans at characteristic kinematics

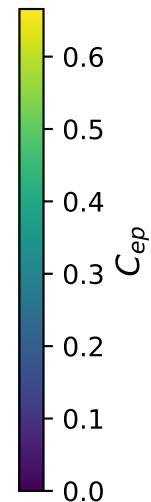

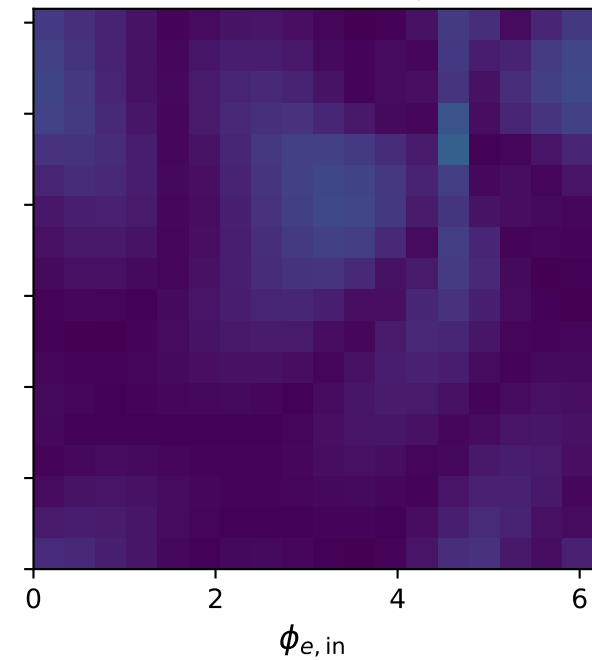

high_s, high_theta_in
low_Egamma, max C_{ep} =0.572

high_s, high_theta_in
mid_Egamma, max C_{ep} =0.611

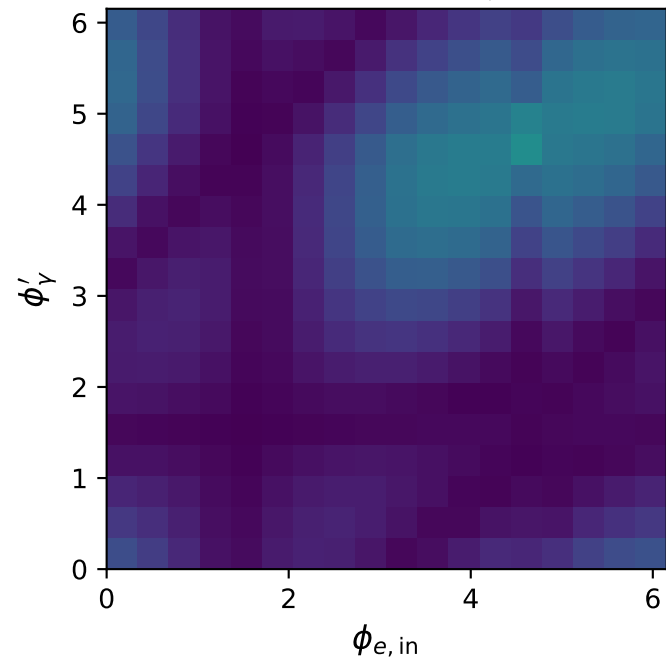

high_s, high_theta_in
high_Egamma, max C_{ep} =0.666

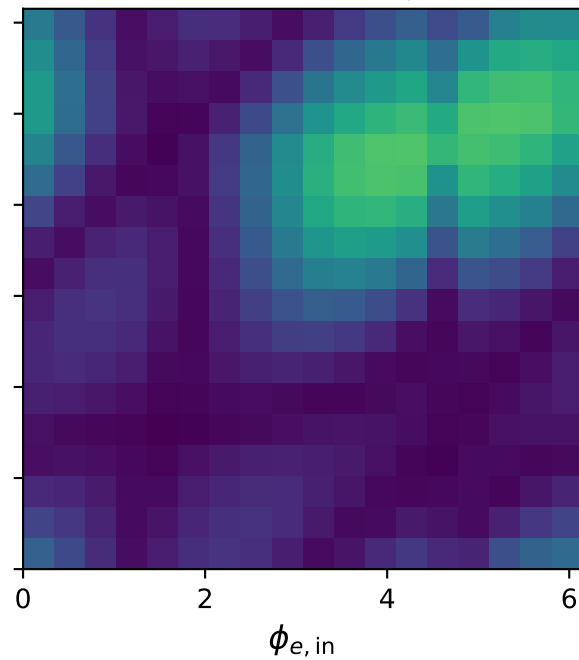

Ty: $C_{e\gamma}$ two-angle scans at characteristic kinematics

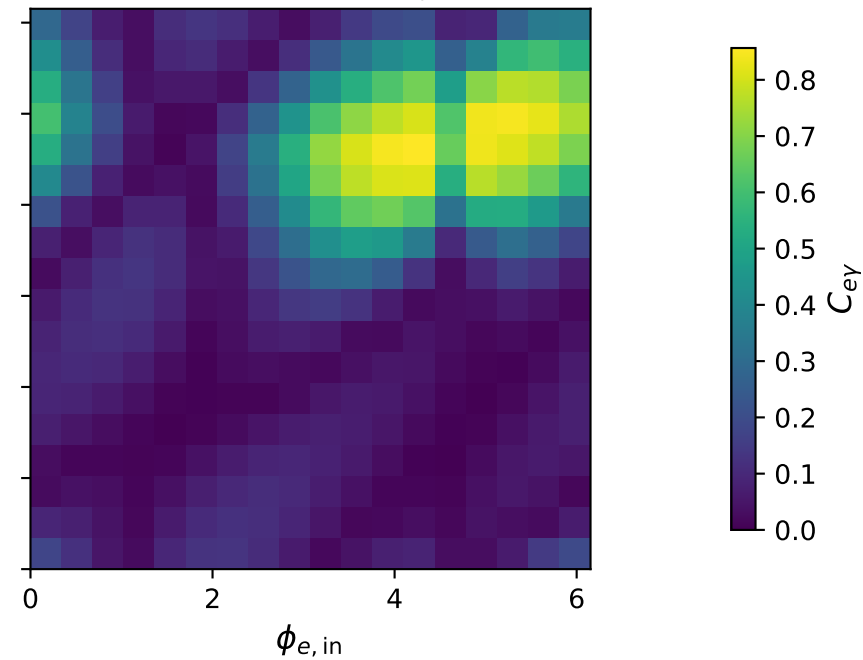

high_s, high_theta_in
low_Egamma, max $C_{e\gamma}$ =0.672

high_s, high_theta_in
mid_Egamma, max $C_{e\gamma}$ =0.627

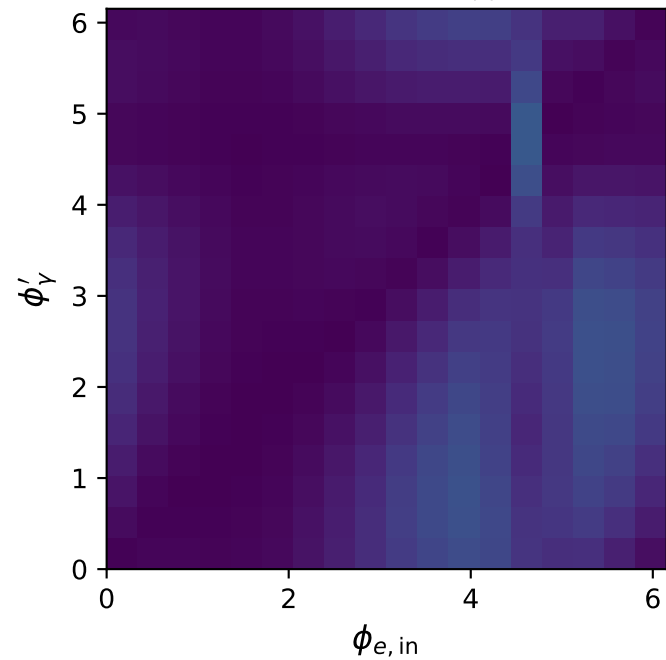

high_s, high_theta_in
high_Egamma, max $C_{e\gamma}$ =0.857

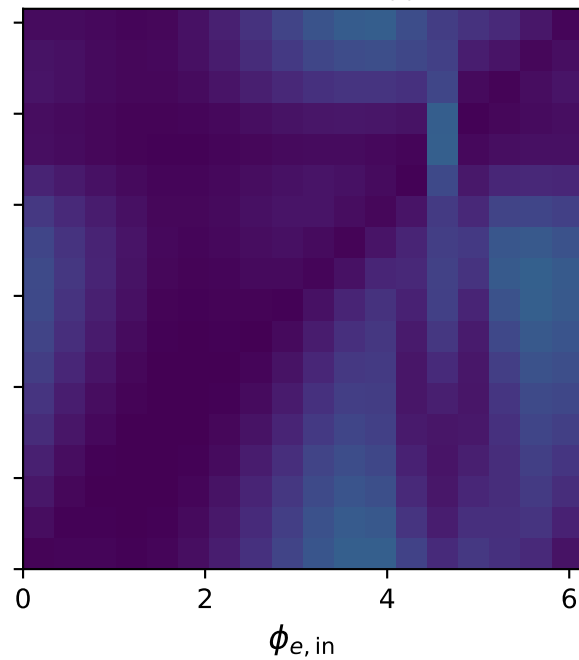

Ty: $C_{p\gamma}$ two-angle scans at characteristic kinematics

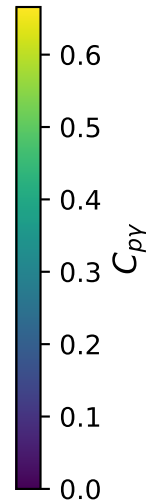

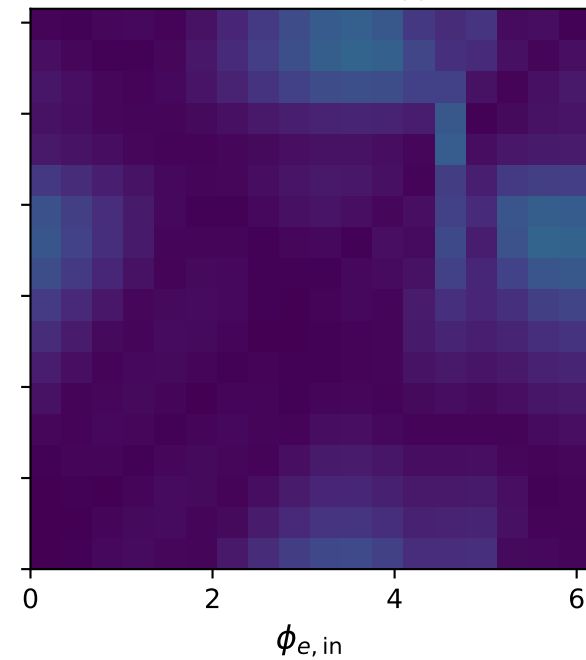

high_s, high_theta_in
low_Egamma, max $C_{p\gamma}$ =0.573

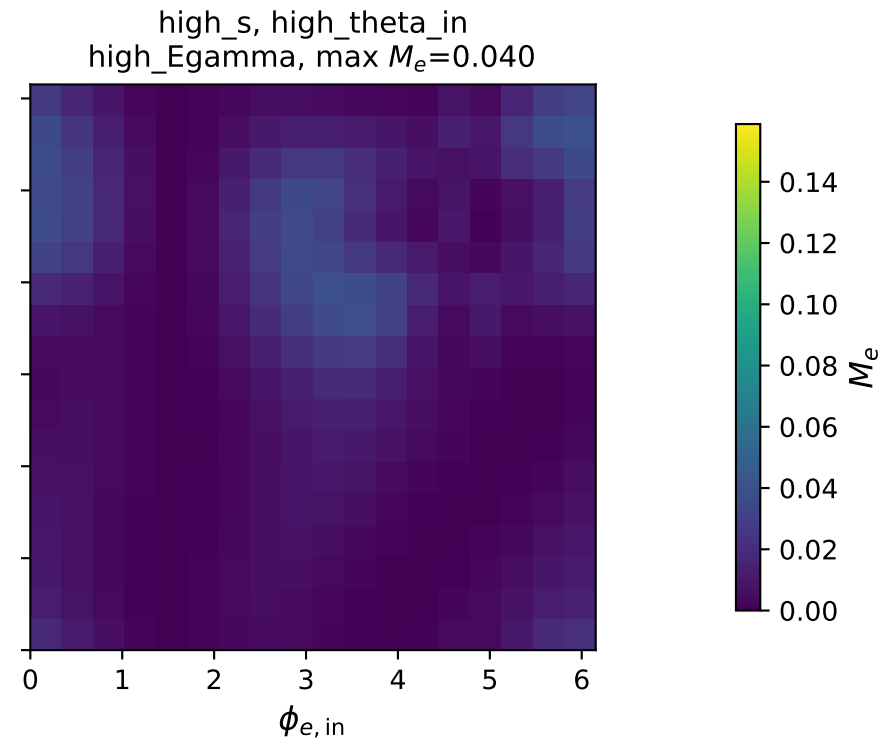

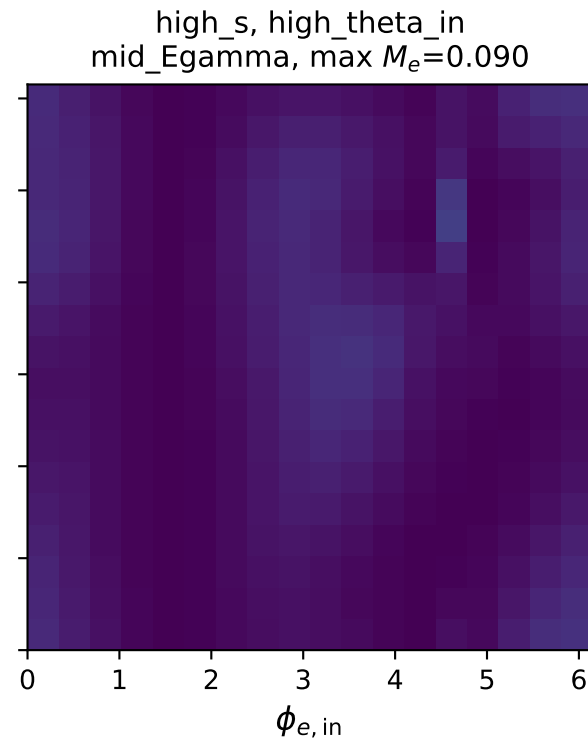

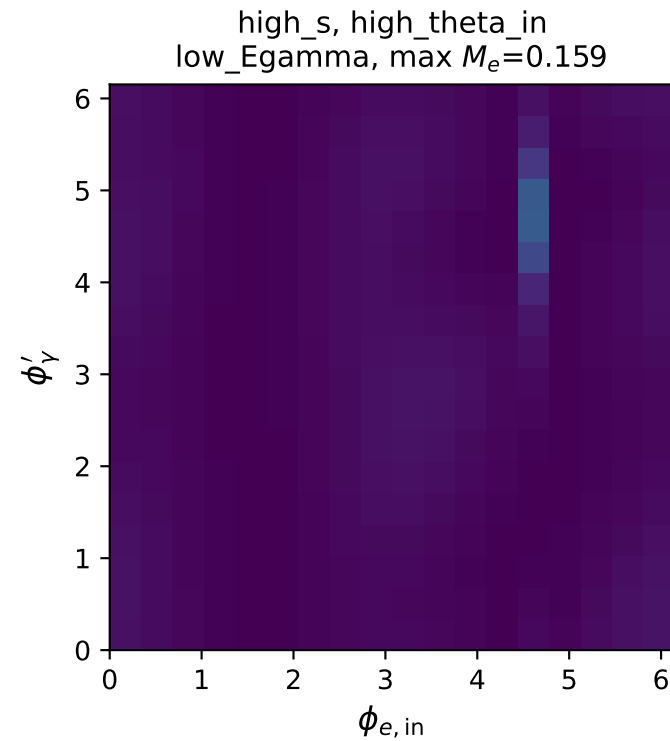

high_s, high_theta_in
mid_Egamma, max $C_{p\gamma}$ =0.613

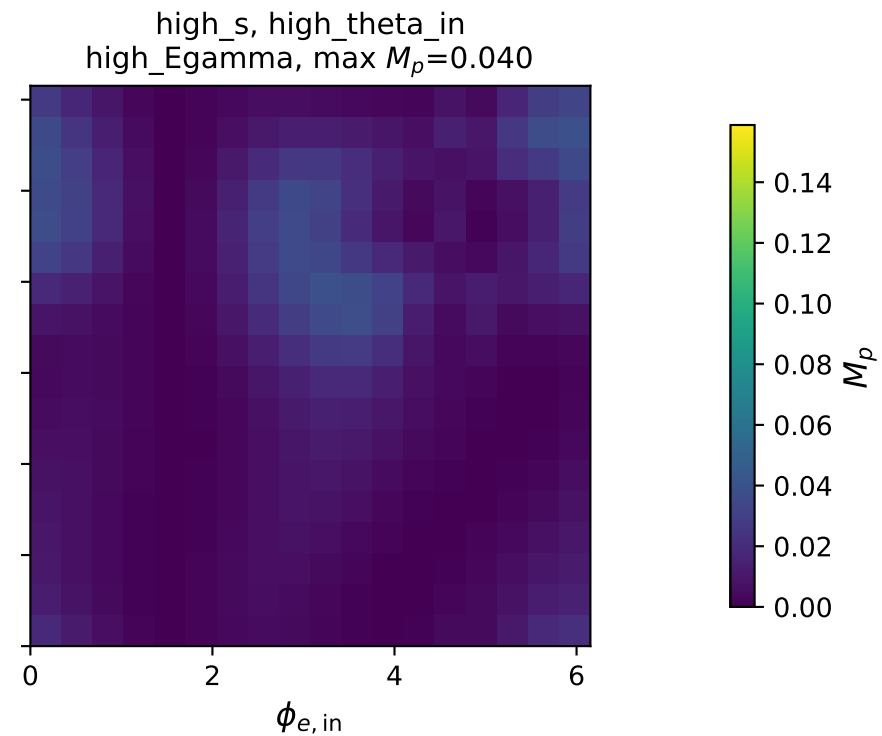

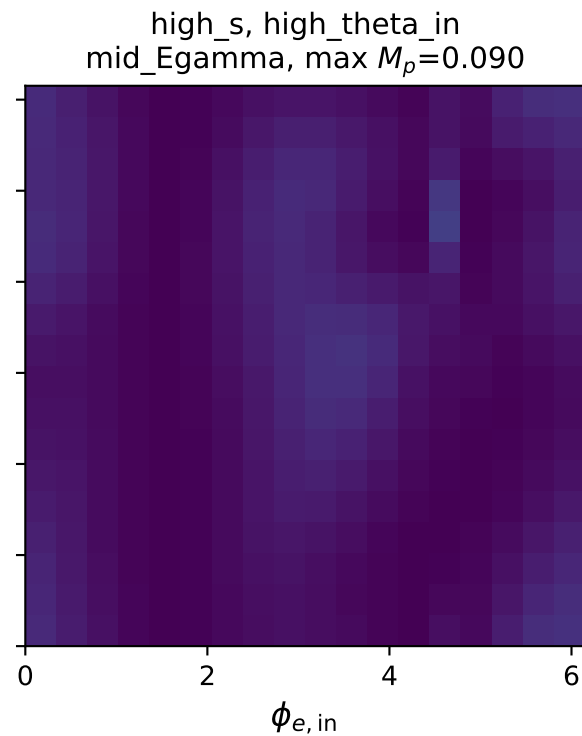

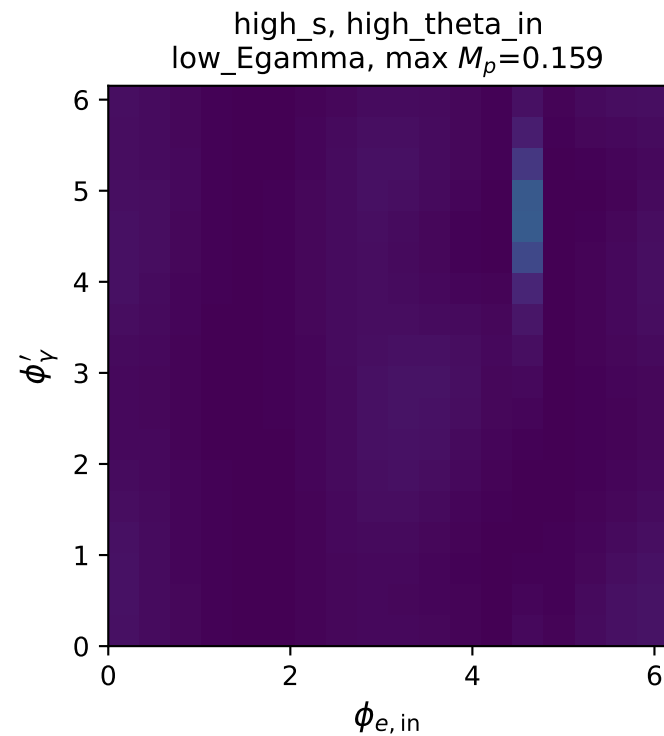

high_s, high_theta_in
high_Egamma, max $C_{p\gamma}$ =0.666

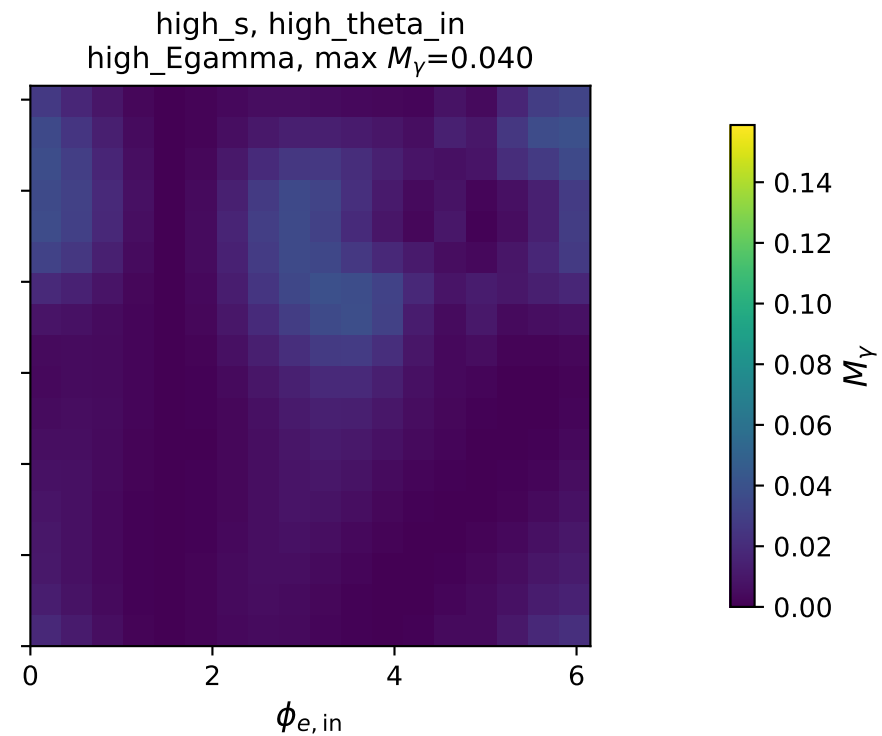

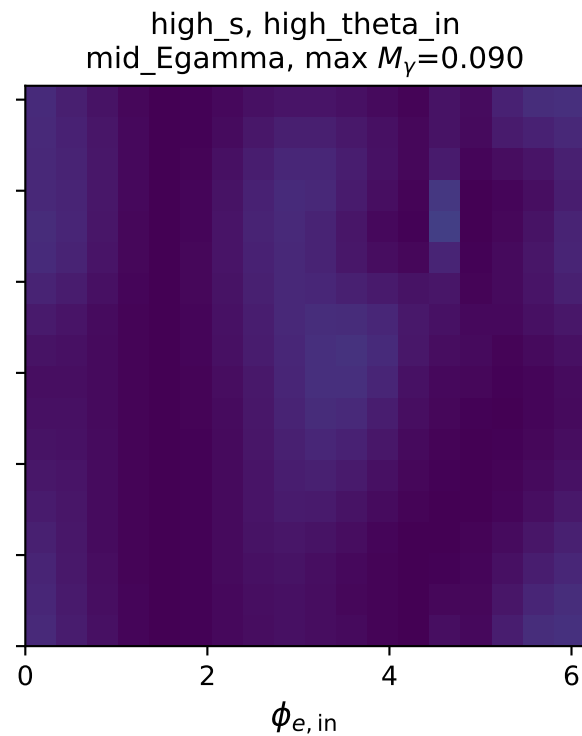

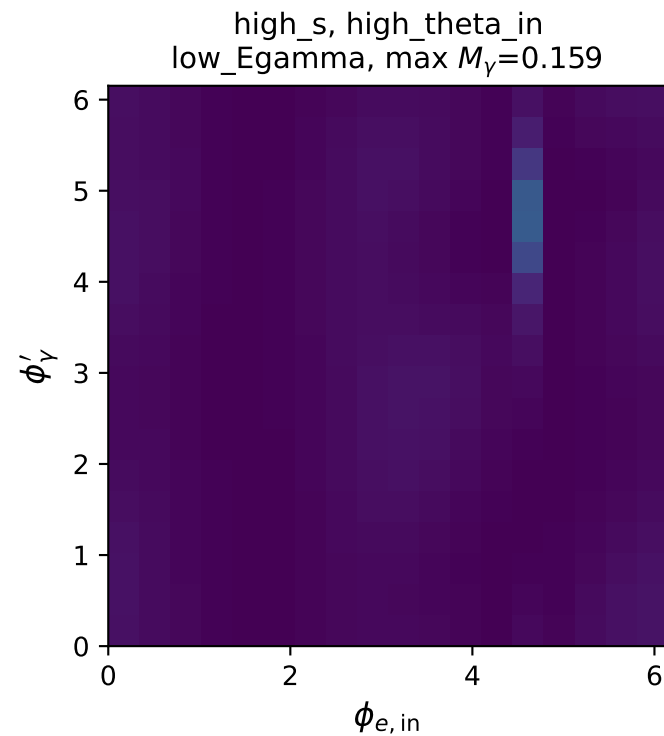

Ty: M_e two-angle scans at characteristic kinematics

Ty: M_p two-angle scans at characteristic kinematics

Ty: M_γ two-angle scans at characteristic kinematics

Ty: F_3 two-angle scans at characteristic kinematics
